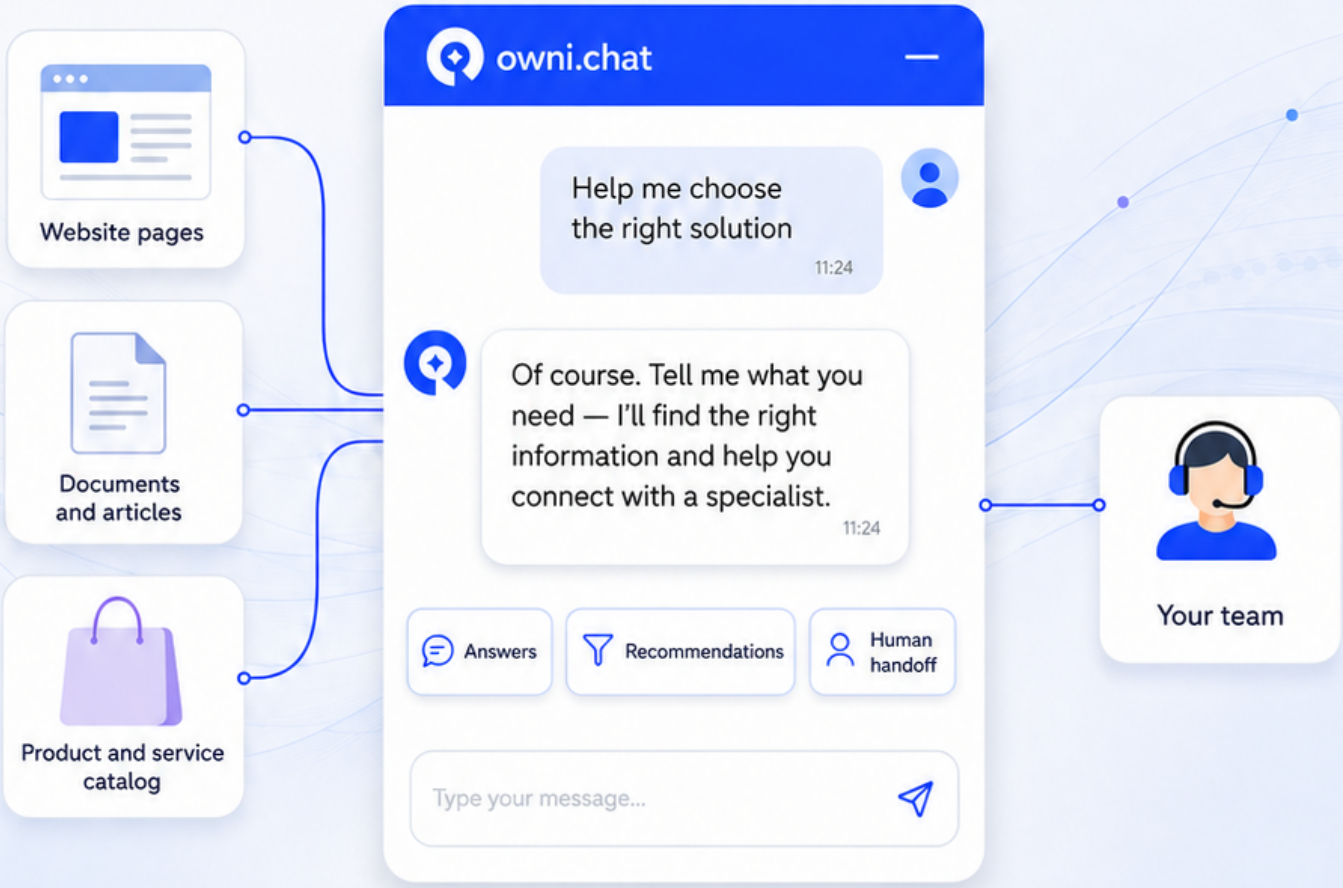
owni.chat

Your website already has the answers. owni.chat helps your customers find them.

AI assistant and live chat for sales, support, and customer conversations.



From question to conversation. From conversation to action.

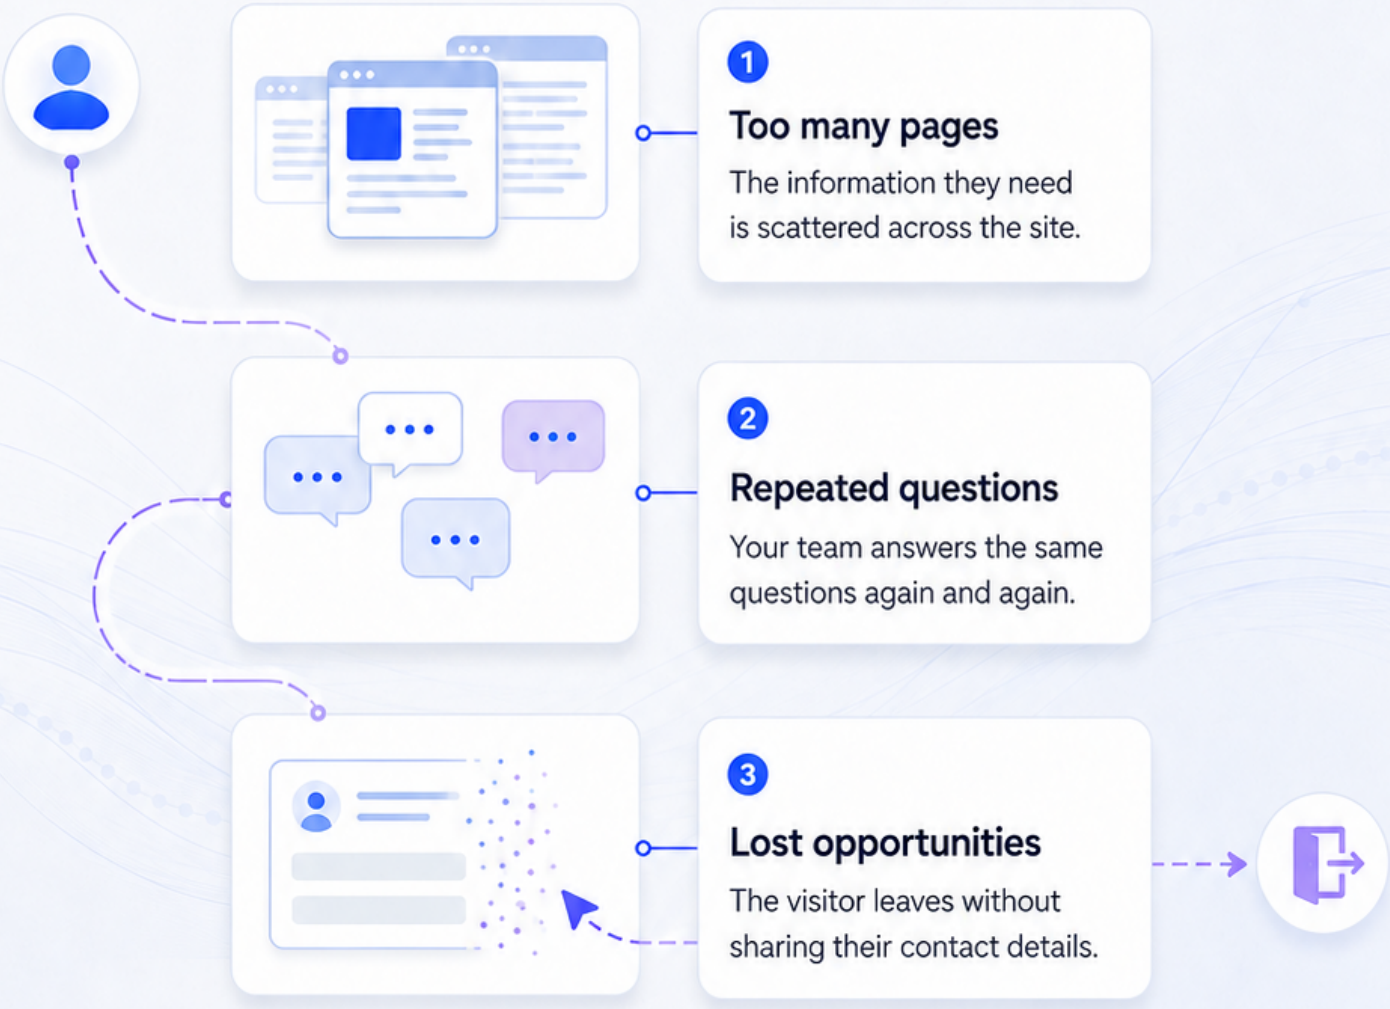
THE PROBLEM

Visitors leave when they can't find an answer in time

Even an informative website doesn't always help people make a quick decision.



1
Too many pages
The information they need is scattered across the site.

2
Repeated questions
Your team answers the same questions again and again.

3
Lost opportunities
The visitor leaves without sharing their contact details.

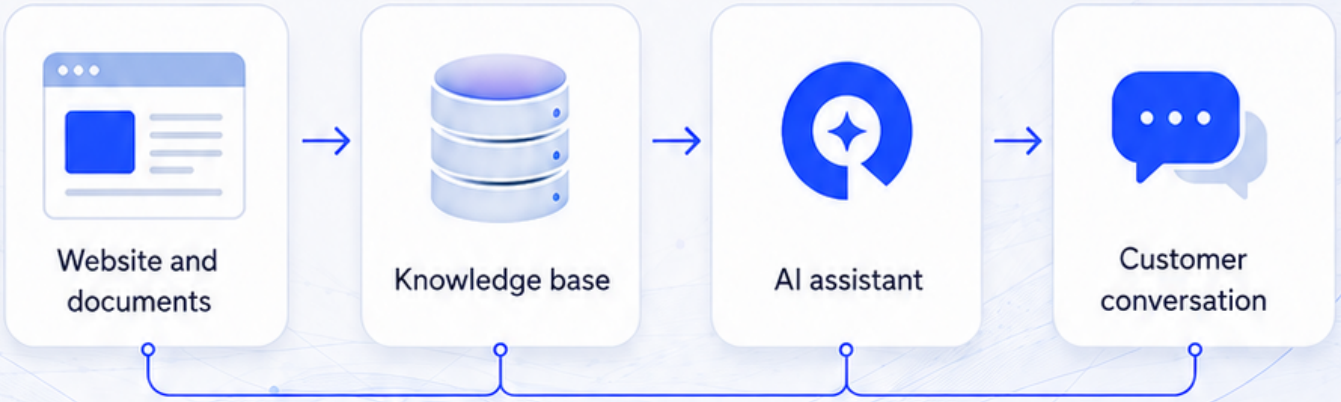
owni.chat turns information search into a simple conversation.

owni.chat

HOW IT WORKS

From your website to a ready-to-use AI assistant

No website migration
or complex setup required.



01

Add your information

Enter your website, upload documents, or connect a catalog.

02

Test the answers

Ask test questions and adjust the conversation style.

03

Launch the chat

Install the widget and start helping visitors.

**Keep your information updated —
your assistant's answers will stay current.**

owni.chat

CAPABILITIES

One chat for different business needs

Help customers at every stage:
from their first question to contacting your company.

Answers questions

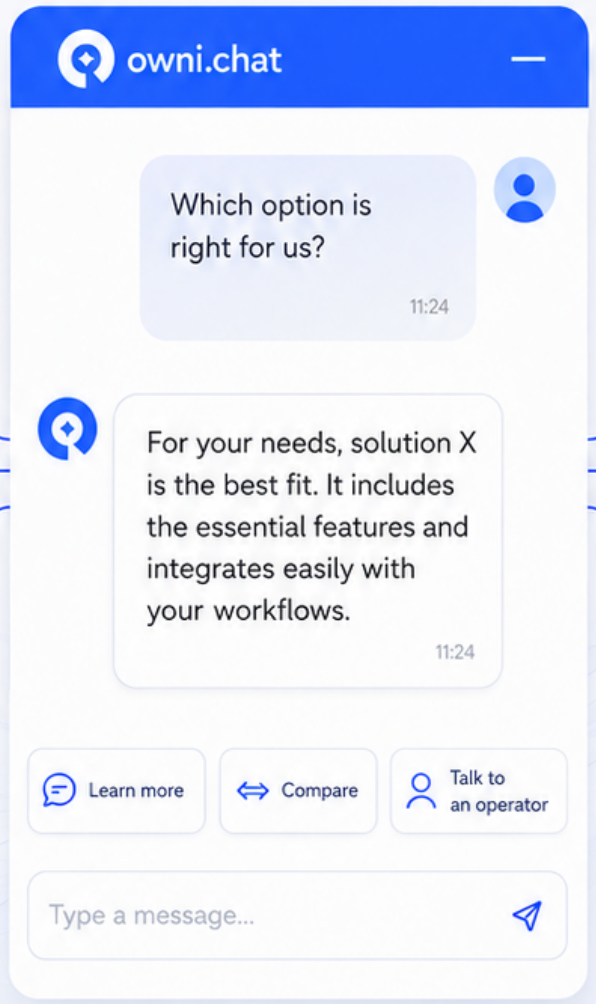
Uses your company's information.

Compares options

Explains differences in plain language.

Hands off to your team

Connects an operator to the right conversation.



Helps customers choose

Finds relevant products, services, and resources.

Captures inquiries

Collects the contact details you need.

Available 24/7

Visitors get answers when it suits them.

A quick answer helps visitors take the next step.

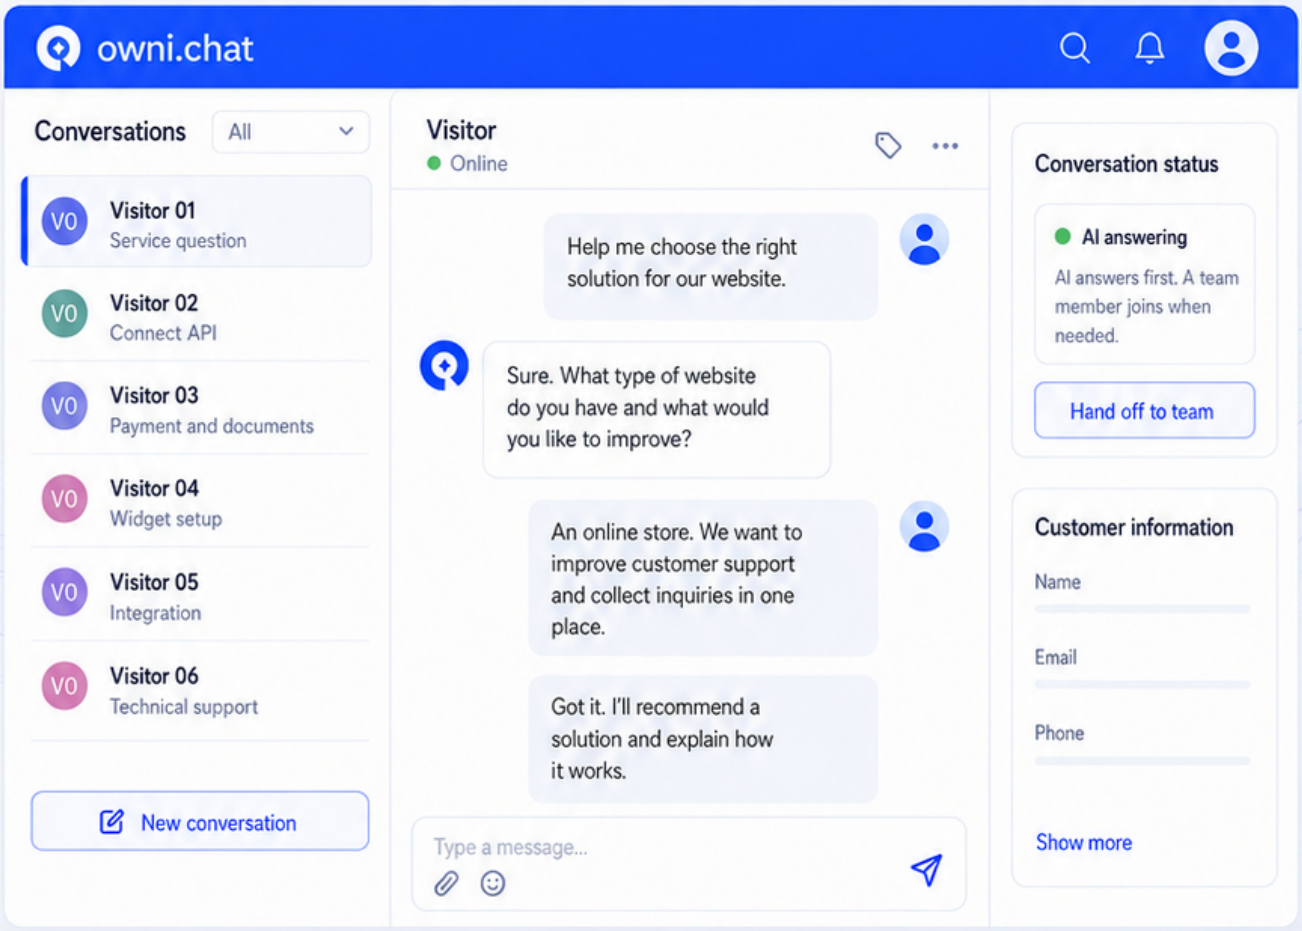
PLATFORM

More than an AI assistant

Your team stays in control of every customer conversation.



1 Unified inbox
All conversations in one interface.

2 Hybrid mode
AI answers first; a team member joins when needed.

3 Forms and flows
Collect data and guide visitors.

4 Widget customization
Match the chat to your brand.

5 Conversation history
Keep the full customer context.

6 Integrations and API
Connect your own systems and workflows.

Automation supports your team — without taking away control.
